THE WEEK IN OIL. Price Shrinks About a Cent on Very Light

Trading. There was no trading in oil yesterday, the buying element failing to show up. The range of fluctuations was restricted to 1/2 of a cent. The opening, highest, lowest and close was 76%. At the windup 76% was bid. The market was strong and weak by spells during the week. The highest point reached was 78, and the lowest 77%. As compared with Monday's opening, Saturday's figures showed a loss of about 1 cent.

The only reason for the weakness developed The only reason for the weakness developed yesterday was the unsettled condition of the outside stock markets and apprehensions of a money squeeze. Otherwise the conditions were builtsh, the decline in production and increase in shipments being conspicuous.

There was no change in quotations on refined, but a hint was conveyed in a London telegram that it would be marked up this week.

The Share Market Continues Active and Weak, With Aggravated Bear Raids-Material Losses All Along the Line-Bank Statement.

NEW YORK, March 7 .- The stock market tolay was fairly active, especially for the leading tocks, but remained weak, and, notwithstanding heavy coverings of shorts, shows material sses for the day all along the line. The news from abroad was again disquieting, and the situation in the Argentine Republic was repre sented as being serious, which condition of af fairs was reflected in the London market by lower prices for all securities.

There was no perceptible selling of stocks in this market for foreign account, but the professional element in the room was bearish to a nervous and irregular nearly all day. The first

Speculation Crippled by Argentine Matters -Foreigners Unloading Americans. The situation in the speculative center of America is interesting, as shown in the follow-ing telegraphic letter from Watson & Gibson to John M. Oakley & Co. : We can hardly add anything to our letters of the past fortuight in which, by varied phases, we tried to express our opinion that the mar-ket was artificial and destined to break sooner

or later. It has been supported in a negative way by holders who have been reluctant to sell, but who bought no more. Little bears have been timid and modest because those whom they have been accustomed to follow have apparently been committed to the bull have apparently been committed to the built side, and this has taken the nerve and courage away from the smaller ones.

Argentine matters continue threatening though to-day and yesterday have been holidays in Buenos Ayres, arranged by the Government there to check the panicky feeling and give time for reflection. But reflection can hardly bring agreeable results for the simple fact is that the cup-dity of European investors has furnished a population not much larger fact is that the cupidity of European investors has furnished a population not much larger
than London itself with \$1,000,000,000 in a few
years under the temptation of high interest
rates. That population cannot take care of
such indebtedness and some of these foreign
houses, most deeply involved, must fall and the
Argentine Government itself stop payment before the acme of the crisis will be attained.
Ourstock market feels the Argentine struation by reflex action through London and more
gold will have to go to the Southland and it
can be had here more readily than elsewhere.
Then, too, it is the old story of foreign holders
parting with their best American and domestio
investments to protect their cats and dogs in
South America. When things getsettled English capital when it goes away from home hereafter, will come this way and some time will be
a great bull card for our securities—but not
yet.

Todayla market was weak and in many

a great bulk card for our securities—but how yet.

To-day's market was weak, and in many stocks the lowest prices of the year were registered. The bank statement showed a loss of \$2.250,000 specie and legal tenders due to interior shipments and Treasury absorptions, but this had no special influence because it was not unexpected. This close brought a rally of about half a point, but this was solely due to the covering of shorts by room traders, who, seeing the falling tendency of values during the past few days, put out a few shorts.

Silver does not go down, and it ought not to go down, it ought to and doubtless will go up for the structure of debt and credit of bank deposit and financial operations is so great that posit and financial operations is so great that the world's stock of gold is inadequate. A more liberal policy toward silver is inevitable, it will all have to be used as money, and but little of it will continue on the market as merchandise.

Partridge says he came direct from Loudon with instructions to secure the letters at any price and at all hazards. He fol-lowed his man to Australia, then to Cali-fornia, and finally located him here. A dicker was made and a compromise effected whereby the holders were paid several thousand dollars for the letters in question, a number of which were from noted persons

BARE FACTS.

The Whole Matter Conclusively Summed Up.

THE SUBJECT DISCUSSED.

What is catarrh? Catarrb, as generally known, is a diseased condition of the mucous membrane of the nose and throat.

How caused? Its causes are numerous, but frequent repetitions of colds, consequent upon our changeable climate, is the one most general.

our changeable climate, is the one most general.

What does it lead to? If not treated it leads to various unhealthy conditions, such as impaired hearing, loss of the sense of smell, weakened vision, bronchial affections oftentimes terminating in coasumption. The stomach and intestines become diseased ill-smelling discharges from nose and ears result; in fact, the whole system becomes affected.

Is it prevalent and can it be cured? Dr. Carl Seller, the most eminent throat and nasal specialist in the United States, says: "It is estimated that about nine hundred and ninety thousand persons out of one million suffer from this disease. This very frequency gives rise to a popular belief that it is incurable. Yet with proper and rational treatment a patient can be cured in a comparatively short time."

The preceding should prove conclusively that we make no false claims when we say that Drs. Copeland & Shair's treatment absolutely cures, Hundreds of patients can so testify. This week we add the following:

Mr. R. McDonald, living at Duquesne, Pa., and employed as weighmaster at the Allegheny Bessemer Steel Works, says: "I have suffered for 19 years. I had pains in the head, limbs and chest about the region of the heart. My ness was stopped up, and there was ringing noises in my ears. I hawked and spit up mucous continually. My eyes were weak, and I suffered from nausea and weak stomach. Had no continually. My eyes were weak, and I suf-fered from nausea and weak stomach. Had no-appetite, felt dizzy upon rising, and was always tired in the morning. I decided to treat with Drs. Copeland & Blair, and I am glad that I did. I am free from headaches and pains. My nose is clear and bearing well. I have regained my appetite, and in the morning I feel rested. My dizziness has left and I feel better to-day than ever before."
